Are solar lights a good idea?

Solar lights are a smart, low-cost way to elevate your yard. Most options are budget-friendly, take minutes to install, and instantaneously upgrade the look of your outdoor areas--day and night. They impact the feel of your space, too, making it a more comfortable place to be after dark, without drastically increasing your electric bill.

Are solar lights worth it?

In our guide about how to buy solar lights, I went over lumens and Kelvin, measures of brightness and color. For bright solar lights, you need around 300 lumens, and it should be above 3000 Kelvin for a bright, light white that illuminates everything. Bright solar lights can be worth it, you just have to shop around.

Are solar lights durable?

The solar lights seem durable, too. Although they haven't yet weathered storms during testing, they're built to withstand all conditions, including rain and high winds. Shatterproof lights bring a soft and pleasant brightness to gathering areas. The string isn't as heavy-duty as we'd like it to be.

What are the best solar lights for your outdoor space?

The best solar lights for your outdoor space depend on where you want more light at night. The Alepod Solar Pathway Lights are our all-time favorite for illuminating pathways, and the Better Homes & Gardens Nico Solar Powered LED Deck Post Cap Light is great for gathering areas, like decks and patios.

Even with higher ratings, invoking caution, homeowners installing solar lights in exposed areas should ensure all connections are ...

Like most solar-powered path lights I've used, this set turns on automatically at sundown and off at daybreak. It's safe for outdoor use (though it's not IP-rated) and has a one ...

Find the best solar lights with our expert reviews of 11 top-rated models. From security lights to pathway lighting, we tested brightness, battery life, and durability.

Whether you want ambient lighting for your garden or security lighting for your front porch, solar options provide reliable illumination ...

The most effective options are durable enough to withstand inclement weather, powerful enough to function just like electric lights and remain reliable for several years.

The best solar-powered outdoor lights can add visual appeal and safety to outdoor decks, steps, and walkways.

I've tested plenty of solar lights, and I think they can be worth it - but only sometimes. These are the five truths I've learned from years of testing

Experts recommend tilting your solar panels between 30 and 50 degrees to ensure they receive adequate sunlight even during winter ...
