Which hybrid inverter is best for your solar power system?

Overall, with its easy plug-and-play installation, comprehensive certifications, and efficient management of power from solar, battery, and grid simultaneously, the EG4 18kPV All-In-One Hybrid Inverter is the ultimate solution for any solar power system.

How much does an inverter cost?

Medium Residential Systems (6-10 kW): You'll likely need an inverter between 6 and 10 kW, with costs between \$1,800 and \$3,500. Large Residential/Small Commercial Systems (10+kW): These require inverters 10 kW and above, with prices starting around \$3,000 and going up significantly depending on the specific application.

Can EG4 18kpv hybrid inverter be used as a backup power system?

And in case of a power outage, the EG4 18kPV All-In-One Hybrid Inverter can be used as a backup power system without solar. With remote monitoring capabilities, an improved UI, and a sleek design, this inverter is a top-of-the-line solution for your solar power needs.

What type of Inverter should I buy?

This equipment is ideal for installation in residential areas, is highly efficient, reliable and durable. Inverters with single-phase and three-phase alternation current output of 220 and 380 V are readily available in our online store. Three-phase models can be used in homes or industrial sites.
