-----

This paper presents a novel integrated Green Building Energy System (GBES) by integrating photovoltaic-energy storage electric vehicle charging station (PV-ES EVCS) and ...

Building Integrated Vehicle Energy Solutions (BIVES) and Resilient Energy Storage and Backup (RESB) represent the most accessible and immediate opportunities for adopting bidirectional ...

A "bidirectional charging" EV trial is under way that, in years to come, could help solve the UK's energy conundrum.

This study evaluates the long-term environmental effects of a widespread deployment of bidirectional charging in the European energy supply sector using a prospective life cycle ...

This paper proposes a novel high-conversion-ratio high-efficiency isolated bidirectional dc-dc converter. The proposed converter is operated in the step-down stage.

By synthesizing these advancements, we propose a strategic direction for the advancement of integrated PV storage and charging solutions, paving the way for scalable and resilient energy ...

The case study focuses on rural distribution grids in Southern Germany, projecting the repercussions of different charging scenarios by 2040. Besides a Vehicle-to-Grid scenario, ...

The objective of this article is to propose a photovoltaic (PV) power and energy storage system with bidirectional power flow control and hybrid charging strategies.

# **Bidirectional charging of photovoltaic energy storage containers for wastewater treatment plants**

Website: <https://gebroedersducaat.online>

The Bidirectional Charging project, which began in May 2019, aimed to develop an intelligent bidirectional charging management system and associated EV components to ...

The technology enables charging the batteries of electric vehicles and transferring the stored energy back to the stationary storage system in the building or to the grid when ...
