-----

China is building an enormous network of clean energy industries on the Tibetan Plateau, the world's highest. The intention is to harness the region's bright sunshine, cold ...

Solar panels have been installed on about two-thirds of the land. When completed, it will have more than 7 million panels and be ...

China is advancing a nearly 1.3 terawatt (TW) pipeline of utility-scale solar and wind capacity, leading the global effort in renewable energy buildout. This is in addition to China's already ...

High on the Tibetan Plateau, a sea of photovoltaic panels is quietly rewriting what a power plant can be. China's biggest solar farm is not only feeding gigawatts into the grid, it is cooling ...

In a groundbreaking shift from coal to clean energy, China has launched the world's largest floating solar farm atop a flooded former coal mine in Huainan, Anhui Province.

Electricity from solar has overtaken hydropower in China and is poised to surpass wind this year to become the country's largest source of clean energy.

Electricity from solar has overtaken hydropower in China and is poised to surpass wind this year to become the country's largest source ...

China is leading the world in new solar and wind installations and doing so at a record-shattering pace. In May 2025 alone, the country ...

Solar panels have been installed on about two-thirds of the land. When completed, it will have more than 7 million panels and be capable of generating enough power for 5 million ...

China has connected the world's first 1-GW offshore solar farm to the grid, a plant off Shandong set to generate 1.78 TWh per year.

China is leading the world in new solar and wind installations and doing so at a record-shattering pace. In May 2025 alone, the country added 93 gigawatts of solar capacity, ...

In a groundbreaking shift from coal to clean energy, China has launched the world's largest floating solar farm atop a flooded former ...

The world's largest 1 GW offshore solar farm located off the coast of Dongying, Shandong Province, China is now connected to the grid.

China has brought a 1 GW offshore solar power plant online off the coast of Dongying, Shandong province, combining PV with energy storage and aquaculture in what is ...

China is building an enormous network of clean energy industries on the Tibetan Plateau, the world's highest. The intention is to ...
