Discover how collaboration is fueling Gothenburg's thriving battery cluster, including advancements in hydrogen fuel cell tech and sustainable transport solutions.

Construction of the plant will start in 2023 and it will produce state-of-the-art battery cells, specifically developed for use in next generation pure electric Volvo and Polestar cars.

Summary: Gothenburg's new energy storage project addresses renewable energy challenges through cutting-edge battery systems. This article explores how this initiative supports ...

Established in 2022, the company has set up a research and development center in Gothenburg to build on the battery expertise within both companies and develop next ...

Discover how collaboration is fueling Gothenburg's thriving battery cluster, including advancements in hydrogen fuel cell tech and ...

Alelion Energy Systems has decided to build a factory in Gothenburg for the production of lithium batteries for use in, among other things, industrial vehicles.

NOVO Energy develops and manufactures lithium-ion batteries optimized for automotive applications, emphasizing sustainability from material selection to final assembly. Their R& D ...

This article explores the project's technical breakthroughs, latest milestones, and how large-scale battery systems are transforming renewable energy integration.

Explore how Gothenburg is shaping the battery industry. Discover innovations and investment opportunities in
