Is Doe preparing a draft energy storage SRM for public comment?

DOE is seeking comment from stakeholders to inform its draft Energy Storage SRM for public comment at a future time; notice of its availability will be provided through the Federal Register through a formal NOA. Interested stakeholders can view both the draft SRM and the official NOA.

Why is 116clean energy DC building operator training important?

It is important for 116CLEAN ENERGY DC building operators to receive training as poor energy management can negate all the gains of high efficiency building systems. Modern, energy-efficient commercial buildings require specialized knowledge to operate.

What resources are available for energy storage?

The following resources provide information on a broad range of storage technologies. General Battery Storage, ARPA-E's Duration Addition to electricitY Storage (DAYS), HydroWIRES (Water Innovation for a Resilient Electricity System) Initiative

When will DC adopt a net-zero energy code?

For new construction of single-family and small multifamily residential buildings (<10,000 square feet) in DC, the District Government should adopt a net-zero energy code in 2021. For substantial renovations, the net-zero energy requirement is set for 2026 at the very latest.⁸³

Collaborative efforts between industry and government partners are essential for creating effective rules and ordinances for siting and permitting battery energy storage systems as energy ...

The Commission continues to monitor an AltaGas merger commitment to develop, or cause to be developed, 10MW of either electric grid energy storage or Tier 1 renewable resources in the ...

The Clean Energy DC plan lays out a thoughtful set of actions that the District Government, local businesses, and residents can take over the next 15 years to dramatically reduce the District's ...

The goal of this Request for Applications (RFA) is to increase renewable energy storage capacity in the District of Columbia through the adoption of battery energy storage systems (BESS).

Today, the U.S. Department of Energy released its draft Energy Storage Strategy and Roadmap.

Electrical Energy Storage (EES) systems store electricity and convert it back to electrical energy when needed. Batteries are one of the most common forms of electrical energy storage.

Abstract: With the development of AC/DC hybrid microgrid, the grid design of microgrid has become a research hotspot.

The following resources provide information on a broad range of storage technologies.

Electrical Energy Storage (EES) systems store electricity and convert it back to electrical energy when needed. Batteries are one of the most ...

Funding Distribution of DOEE anticipates satisfying the 15 percent match across all funding years from District funds included in the Sustainability Energy Trust Fund, Renewable Energy ...

Mountains--or even hills, cliffs, and flat-topped buttes--could soon store a whole lot of clean energy. These vertically blessed places are ideal spots for a well-established form of ...
