-----

In January 2025, Borosil Renewables Limited, a leading producer of solar glass, announced plans to boost its manufacturing capacity by 50%. With this expansion, the company's daily ...

Low-iron sand is required for PV glass production, to make the glass highly transparent and reduce the absorption of solar energy. Additionally, glass manufacturing leads to significant ...

This advanced solar photovoltaic glass holds promising potential for the production of various forms of solar panels, particularly bifacial panels, in residential and commercial buildings.

The project is significant in supporting complementary industries to renewable energy projects through the production of flat glass and photovoltaic glass, which are used in ...

In conclusion, the solar glass industry in 2025 presents strong growth opportunities aligned with global renewable energy goals and increasing demand for solar technologies.

Borosil Renewables Ltd., India's manufacturer of solar glass, has revealed plans to increase its solar glass production capacity by 50 percent. This significant move will enhance ...

Mumbai-based Borosil Renewables has announced a 50% expansion of its manufacturing capacity of solar glass from 1,000 to 1,500 ...

With PV module capacity ramping up, glass suppliers have been investing in new solar glass production capacity.

The company is adding a third solar line with a capacity of 550 metric tons which is expected to start
