What is Danish Center for energy storage?

Danish Center for Energy Storage, DaCES, is a partnership that covers the entire value chain from research and innovation to industry and export in the field of energy storage and conversion. The ambition of DaCES is to strengthen cooperation, sharing of knowledge and establishment of new partnerships between companies and universities.

What is a container ship facility in Aarhus?

The facility, designed specifically for container ships, will mark the first of its kind in Denmark and solidify the Port of Aarhus's commitment to green transformation. Under the agreement, Danish company PowerCon will supply the transformer station and power management system for the project.

Is Aarhus a sustainable port?

The Port of Aarhus, Denmark's largest commercial port, has announced the finalization of an agreement to develop one of the most advanced shore power facilities in Europe. This initiative represents a significant step forward in reducing emissions and enhancing sustainable port operations in Northern Europe.

Is Aarhus a green port?

With the completion of the shore power facility in 2026, the Port of Aarhus will continue to set benchmarks in green port operations. This project underscores the port's mission to connect Denmark with the world while embracing sustainable solutions for a changing global economy.

Aarhus is at the forefront of mobile energy storage innovation, offering scalable solutions for industries worldwide. Whether you're managing a solar farm or a remote worksite, local ...

Our portfolio consists of stand alone projects as well as batteries in connection to our wind and solar PV projects. Our goal is to build an integrated business where technology, power trading, ...

Knowing the impact battery storage could have on their decarbonization efforts, the Danish government tapped BattMan Energy to build three battery parks across the country in Tofthland, ...

Think of Henrik as the LEGO master of energy storage--building modular, scalable systems that snap together smarter. Their flagship project in Aarhus uses AI-driven lithium-ion ...

This setup is set to enable the facility to supply power to up to four containerships simultaneously when fully completed. Ports in Aarhus, Gothenburg, Bremerhaven, and ...

Danish Center for Energy Storage, DaCES, is a partnership that covers the entire value chain from research and innovation to industry and export in the field of energy storage and conversion.

That's Aarhus, Denmark's second-largest city, now pioneering energy storage power export solutions. With Denmark aiming for 100% renewable energy by 2030, Aarhus has become a ...
