-----

In this article, PTR's CPO, Saqib Saeed, and Research Analyst, Siddiqa Batool, explain how the Middle East is accelerating its transition toward renewable energy--particularly solar ...

"The Middle East and Africa (MEA) Energy Storage Outlook" analyses key market drivers, barriers, and policies shaping energy storage adoption across grid-scale and ...

The new facility will include solar power with the potential capacity of up to 5GW, which, when combined with the storage element, will provide at least 1GW of guaranteed ...

Distribution is another concern. Conventionally speaking, centralised power plants don't allow several small-scale producers (think residential rooftop solar panels and community solar ...

As the Middle East intensifies its shift to renewable energy, battery storage is becoming a vital part of its infrastructure. Countries like Saudi Arabia and the United Arab ...

With the commercial case for distributed generation set to improve, Alan Whitaker and Hisham Abunassar explore its impact on commercial and industrial consumers, regulators ...

Masdar-EWEC project combining solar and batteries to provide "round-the-clock" renewables unveiled at Abu Dhabi Sustainability Week.

Distributed generation systems, particularly solar PV combined with storage, are being deployed by industrial plants, business complexes, shopping malls, and hotels to reduce operational ...

The UAE has launched what it says is the world's first and largest 24-hour power project, combining solar
