Design your perfect custom insulated glass units (IG) with our custom configurator. Custom double-pane glass delivered to your home.

Insulated glass panels consist of two panes of tempered glass separated by a spacer. The space between the two panes of glass is filled with air, which provide insulation.

Custom manufacturer of architectural hardware, glass, and glazing. Demountable wall systems, double-glazed glass or tempered, wooden doors, and aluminum frames are also provided.

I've read about the difference between double precision and single precision. However, in most cases, float and double seem to be interchangeable, i.e. using one or the ...

Frameless double glazed glass walls & partitions consist of 2 glass window panes separated by a vacuum space & provide outstanding acoustics. Browse here!

Browse our vast inventory of pattern glass, colored glass, antique mirror, digitally printed glass, and more. Our specialty fabrication capabilities include: glass tempering, laminating, ...

Insulite Glass has been fabricating high-performance insulating glass units for over 30 years. Insulated glass units consist of two silicone seals, a primary and a secondary seal.

Our products are made to exact dimensional and spectral tolerances using virtually any glass material available, such as Borosilicate, Aluminosilicate, Corning, Eagle XG, Schott, Borofloat, ...

At Cardinal Glass, we've earned the trust of the window and door industry through consistently providing

high-quality insulating glass units. Our IG products, found in various residential ...

The term double precision is something of a misnomer because the precision is not really double. The word double derives from the fact that a double-precision number uses twice as many bits ...

A double which is usually implemented with IEEE 754 will be accurate to between 15 and 17 decimal digits. Anything past that can't be trusted, even if you can make the ...

Find your double-glazed glass panel easily amongst the 115 products from the leading brands (Sisecam, Kingspan Light + Air, Warm Glass, ...) on ArchiExpo, the architecture and design ...

A double has a much higher precision due to its difference in size. If the numbers you are using will commonly exceed the value of a float, then use a double. Several other ...

Possible Duplicate: Java : different double and Double in comparison In a sample java program for one of my labs, I have two different methods taking Double and double ...

`double d = ((double) num) / denom;` But is there another way to get the correct double result? I don't like casting primitives, who knows what may happen.

From what I have read, a value of data type double has an approximate precision of 15 decimal places. However, when I use a number whose decimal representation repeats, ...
