-----

ILI Group has a portfolio of over 4.7GW energy storage projects, including 2.5GW of utility-scale battery storage and 2.5GW pumped storage hydro. In July, the group submitted a Section 36 ...

Electrification rates are relatively high in Equatorial Guinea at 66%. The country began oil production in the late 1990s and began LNG exports in 2007.

As Equatorial Guinea adopts more renewable sources, integration protocols must accommodate variable generation and storage solutions, requiring flexible and adaptive systems.

With frequent blackouts and growing renewable energy projects, the city is racing to adopt storage solutions that could keep the lights on (and the air conditioners humming).

At IAE 2024, global investors can access Equatorial Guinea's latest investment prospects, as well as interface with the country's relevant oil and gas authorities," says Sandra Jeque, Event & ...

This infographic summarizes results from simulations that demonstrate the ability of Equatorial Guinea to match all-purpose energy demand with wind-water-solar (WWS) electricity and heat ...

As we wrap up, consider this: Could Equatorial Guinea's energy storage journey become a blueprint for other oil-rich nations? The battery revolution here isn't just about electrons - it's ...

Summary: Equatorial Guinea has recently acquired a leading energy storage battery company, signaling its commitment to renewable energy integration. This article explores the implications ...

But with their new 2025 energy storage policy, they're finally tackling the elephant in the room - how to store all that potential solar and wind power. The city currently relies on diesel ...

Energy in Equatorial Guinea is an industry with plenty of potential, especially in the fields of oil and natural gas. However, production has been declining in recent years due to under-investment ...
