How much energy does Equatorial Guinea use?

Electricity consumption in Equatorial Guinea in 2015 was 36 kilotonnes of oil equivalent (ktOE). The country produces all of the energy it consumes. As of 2012, renewable energy accounted for 29.2% of the final energy mix.

Why is energy in Equatorial Guinea declining?

Energy in Equatorial Guinea is an industry with plenty of potential, especially in the fields of oil and natural gas. However, production has been declining in recent years due to under-investment and lack of new discoveries. In 2022, the country produced less than 100,000 barrels of oil per day (bopd) according to OPEC data.

How much oil does Equatorial Guinea produce a day?

In 2022, the country produced less than 100,000 barrels of oil per day (bopd) according to OPEC data. Electricity consumption in Equatorial Guinea in 2015 was 36 kilotonnes of oil equivalent (ktOE). The country produces all of the energy it consumes.

Custom UPS Solutions for Telecom Base May 14, & #x2013;As global telecom operators expand connectivity to rural and hard-to-reach areas, ensuring reliable power for telecom base ...

This analysis includes a comprehensive Equatorial Guinea energy market report and updated datasets. It is derived from the most recent key economic indicators, supply and demand ...
