Can a TRNSYS solar heating system be used in a refinery?

Using TRNSYS software, the proposed Parabolic Trough Collector (PTC)-based solar heating system paired with the boiler is modelled. Sensible thermal energy storage (TES) system is integrated into the refinery's process heating to handle the intermittent nature of solar energy.

Can solar hybrid system generate steam in oil refinery?

Conclusion The present study investigates the feasibility of solar hybrid system to generate steam in the oil refinery to maintain the temperature of heavy crude oil products before despatching from storage tanks. Due to the intermittent behaviour of solar energy, the solar hybrid system is integrated with a sensible heat storage tank.

Can a solar hybrid system be integrated into a refinery?

The amount of fuel and cost savings by the integration of a solar hybrid system into the refinery and the payback period of the system by using different types of fuel in the furnace are shown in Table 6. Table 6. Payback period of the proposed system by using different fuel.

This article explores how advanced battery technologies and solar integration are reshaping the island's energy landscape while addressing common challenges in renewable energy adoption.

Since 2019, Bluesun and CMT Madagascar have maintained a strong and productive relationship. Over the past five years, our teams have collaborated closely, with Bluesun providing ...

Three large-scale heavy fuel oil (HFO) plants in Madagascar are being hybridised with solar PV thanks to a USD 6 million bridge loan from REPP to developer Lidera Green ...

Global organisations and Madagascar's international partners appear to have bought into this vision and have provided considerable ...

With its global scope and a focus on the future of energy storage, this 20th edition on 11-12 March, provide unparalleled opportunities for growth and innovation in the tank storage sector.

The hybridisation of three large-scale heavy-fuel oil power plants with solar PV in Madagascar is as much about reducing CO2 emissions as it is to make a single energy source ...

Case study analysis showed that the proposed energy storage configuration scheme and operation optimization strategy can achieve optimal energy storage investment ...

Madagascar, an island known for lemurs and vanilla, is quietly becoming a trailblazer in container energy storage products. With its growing renewable energy sector and ...

The purpose of this study is to investigate the potential use of solar energy within an oil refinery to reduce its fossil fuel consumption and greenhouse gas emissions.

Global organisations and Madagascar's international partners appear to have bought into this vision and have provided considerable assistance to help the country develop ...

Madagascar-based Filatex has invested EUR10 million in French flywheel storage system manufacturer Energiestro. The two companies ...

Three large-scale heavy fuel oil (HFO) plants in Madagascar are being hybridised with solar PV thanks to a USD 6 million bridge loan ...

The hybridisation of three large-scale heavy-fuel oil power plants with solar PV in Madagascar is as much about reducing CO2 ...

Madagascar-based Filatex has invested EUR10 million in French flywheel storage system manufacturer Energiestro. The two companies are planning to deploy Energiestro's ...
