What is a pure sine wave inverter?

It is for these reasons that a pure sine wave inverter is one of (if not the) most important aspects of your solar array. A sine inverter takes the DC output of your solar array, converts it to AC, and does so in a way which replicates as closely as possible the pure sine wave of grid power alternating current.

What are the different voltage sine wave power inverters?

Inverter.com provides different voltage sine wave power inverter, such as 12V pure sine wave inverter, 24V pure sine wave inverter, 48V pure sine wave inverter and pure sine wave ups inverter.

Why do you need a sine wave inverter?

Most appliances in your home use AC power, so you need it to convert the DC power that solar panels produce to AC power. It also brings up the voltage to the grid level. A pure sine wave inverter also saves you money, as it's much more efficient than the older, jagged wave inverters.

What is a 12V sine wave inverter?

A 12V sine wave inverter is a device that converts DC power from a 12 volt battery or power source into AC power with a sine wave output. By using a 12V sine wave inverter, you can power AC devices and appliances using the DC power available from a 12 volt source.
