What is the energy sector in Benin like?

The energy sector in Benin is primarily reliant on biomass and imported petroleum products, with two percent of net energy consumption coming from electricity. The page below gives an overview of the energy sector in Benin and explains Power Africa's involvement in the country.

Where does Benin get most of its electricity from?

Benin primarily imports electricity from Nigeria and other neighboring countries. Based on 2013 data, Benin's national electrification rate reached 29% (9% in rural areas, 57% in urban areas). Limited and unreliable power is still one of Benin's major problems in the electricity sector.

How much energy does Benin use?

Benin's total energy consumption in 2009 was 3,475 ktoe (World Bank, 2009). The per capita energy consumption in the same year was 0.404 toe. This is about half of the average per capita energy consumption for Sub-Saharan African countries, and less than a quarter of the world average (World Bank, 2009).

What are the different types of energy transformation in Benin?

One of the most important types of transformation for the energy system is the refining of crude oil into oil products, such as the fuels that power automobiles, ships and planes. No data for Benin for 2022. Another important form of transformation is the generation of electricity.

Energy in Benin has a diverse energy mix and takes several forms including: solar, wind, hydropower, biomass, fossil resources, and mineral resources. Out of this energy ...

Infrastructure funded by the compact includes 18 substations and nearly 900 kilometers of new or upgraded high and medium-voltage power lines. The compact is also supporting off-grid ...

How many branches does Benin Energy Storage Power Station have
