How much does a solar system cost in Canada?

The average cost of a residential solar panel system in Canada is around \$2.50 to \$3.50 per watt before incentives. This means that for a 10 kW system, homeowners can expect to pay between \$25,000 and \$35,000 before any rebates or tax credits.

How much does a solar inverter cost?

The inverter is a crucial part of your solar investment, whether you're on the grid or building an off-grid solar system. It connects your solar photovoltaic panels to your home and the grid, determining whether your energy is usable, storable, or wasted. Expect to pay \$1,000 to \$3,500, depending on type, size, and features.

Which solar inverter is best?

String inverters are the most affordable. Hybrid inverters cost more because they handle more functionality. Microinverters, one for each panel, have the highest cost per watt due to their quantity. 2. System Size Larger solar panel systems require higher-capacity inverters.

What is the average return on investment for solar panels in Canada?

Return on Investment (ROI) The average ROI for solar panel installation in Canada is between 10% and 20% annually. Most homeowners recover their initial investment within 8 to 12 years, after which they enjoy free or significantly reduced energy costs. 2.
