-----

Scientists in China have developed a new way of harvesting solar power by applying a translucent coating over a window to direct energy from ambient light to the edge of the ...

It works above and below the rooftop, promising cost savings and enhanced safety. An image provided by the company shows a roof ...

Initially captured in July 2025, the comet arrives from outside our solar system, navigating at approximately 137,000 miles per hour along a hyperbolic path that will carry it ...

It works above and below the rooftop, promising cost savings and enhanced safety. An image provided by the company shows a roof full of solar panels hooked up to Huawei tech ...

Yes, solar panels can work behind glass, but they generate 30-50% less power due to light transmission loss and reflection. Amorphous silicon panels perform best in these ...

Scientists in China have developed a new way of harvesting solar power by applying a translucent coating over a window to direct ...

Solar glass represents a technological advancement in renewable energy that moves photovoltaic (PV) materials beyond traditional rooftop installations. This specialized glazing is designed to ...

Discover the key aspects of Huawei residential solar products, including advanced safety features, high energy yield, smart ...

Discover the key aspects of Huawei residential solar products, including advanced safety features, high energy yield, smart energy management, and reliable all-in-one solutions ...

From strength to strength in Europe's PV market Solar has grown rapidly in Europe in recent years. But to achieve ambitious EU targets, progress is still needed.

Huawei's developed what they call "Cell-to-Grid" protection - basically preventing any fires or explosions in energy storage systems. It's like having multiple safety nets, from the ...

Unlike bulky solar panels, solar glass windows are sleek and modern. They enhance a building's appearance and can be integrated into facades, roofs, or windows ...

Learn about the latest smart PV news and company news. HUAWEI Smart PV News Center provides the latest and hottest news in the industry.

Huawei's developed what they call "Cell-to-Grid" protection - basically preventing any fires or explosions in energy storage systems. ...
