Are untapped re sources a solution to energy issues in Kyrgyzstan?

It is also mentioned that the untapped RE sources are the solutionto resolve the energy issues of Kyrgyzstan. However, the recent theoretical development identified that the current energy policy is considered as one of the key barriers for the development the RE sector in Kyrgyzstan.

Why is Kyrgyzstan's energy sector deteriorating?

in Kyrgyzstan.Deteriorating infrastructureThe deterioration of energy sector infrastructure coupled with the financial crisis in the energy system will eventually lead either to a significant decrease in the quality of produ

Why is energy policy important in Kyrgyzstan?

The current energy policy is considered as one of the key barriers to the developing the renewable energy sector in Kyrgyzstan. Hence,there is an immediate need to evaluate the formulated energy policy to investigate gaps and uncertainties.

What is Kyrgyz energy policy?

Outlook to the Kyrgyz energy policy To unleash the RE capacity, the Kyrgyz government introduced the law titled "Renewable energy sources(RES)" in December 2008 (Ministry of justice of the Kyrgyz Republic,2008). Kyrgyzstan was the first country in Central Asia who implement RE-based law.

Kyrgyzstan's Cabinet of Ministers have signed an investment agreement with two Vietnamese companies for the development of a 1.9 GW solar project.

Invest in mix of small hydro, solar and wind projects in the next 10 years (while large hydro are being built), including decentralized solutions with storage capacity in the remote regions;

Today, effective government regulation plays a crucial role in the development of the sector. This includes the
