-----  
Why do we need a battery system in Latvia?

The battery system is an essential infrastructure element for the security and stability of Latvia's energy supply. The batteries will work as modern accumulators for storing large volumes of energy, which will be important for ensuring energy balance once the Latvian electricity supply grid works in sync with the European grid."

How can Latvia reduce its reliance on foreign sources of energy?

The Latvian government is interested in diversifying supplies and in developing more local resources to reduce the country's reliance on foreign sources of energy. To reach these targets, government agencies and entrepreneurs have discussed options to move beyond hydropower into wind and biomass power plants.

When will infrastructure projects in Latvia be completed?

According to the original plan, all infrastructure projects in Latvia will be completed by the end of 2025, with the bulk of the work completed by February 2025, ensuring technical readiness for the safe and stable operation of the system in synchronisation mode. If playback doesn't begin shortly, try restarting your device.

Latvian company Perkons Energy specialises in the development and manufacture of high-performance battery packs, which it supplies to customers throughout the world. These ...

Easily find, compare & get quotes for the top Latvian Energy Storage Power Station Project equipment & supplies

Latvian transmission system operator Augstsprieguma tīkls AS (AST) and German company Rolls-Royce Solutions GmbH (Rolls-Royce) have started cooperation on the construction of ...

The delivery includes inverters and battery control equipment for a battery energy storage system (BESS), one

of the most powerful in ...

Why should you choose energy storage solutions? Whether you're seeking off-grid independence or grid-connected benefits, we provide reliable Energy Storage Solutions that ensure ...

From residential battery walls to 100MW grid-scale installations, Latvian power storage manufacturers deliver solutions that balance innovation with practicality.

We have extensive manufacturing experience covering services such as battery enclosures, Energy Storage Cabine, Battery Storage Cabinet, Power Storage Cabinet, Solar Storage ...

With EU directives pushing for 45% renewable integration by 2030, the Baltic state faces a make-or-break moment. Enter energy storage containers - the Swiss Army knife of modern power ...

The most promising sectors for renewable energy equipment in Latvia are energy efficiency solutions, battery storage technologies, biomass power, wind energy, and energy ...

The delivery includes inverters and battery control equipment for a battery energy storage system (BESS), one of the most powerful in the European Union. The system, with a ...

ASOTO O&#220; is an innovative company registered in Estonia with a factory and warehouse located in Riga, Latvia. ASOTO O&#220; primarily designs and produces bespoke gas-powered plug & play ...
