What is long duration energy storage (LDEs)?

No events are available at this time. The Long Duration Energy Storage (LDES) program invests in projects that accelerate the implementation of long duration energy storage solutions to increase the resiliency and reliability of our energy infrastructure and meet the state's energy and climate goals.

What is the long-duration energy storage portfolio?

The Long-Duration Energy Storage portfolio helps to advance LDES systems toward widespread commercial deployment. The goal of this portfolio is to fund projects that will overcome the technical and institutional barriers that exist for deployment, with a focus on different technology types for a diverse set of regions.

What is the long-duration energy storage pilot program?

Long-Duration Energy Storage Pilot Program: These projects will advance a diverse set of LDES technologies towards commercial viability and utility-scale demonstrations. Read the OCED News Alert announcing the Notice of Funding Opportunity, published September 2024. Download the Notice of Funding Opportunity, issued September 2024.

Will changes in trade and tax policy affect energy storage projects?

Changes in trade and tax policy may increase costs and put a damper on near-term forecasted energy storage projects. On February 4, 2025, an additional 10% tariff on all goods imported from China went into effect.

the epa defines a mobile refueler as a bulk storage container onboard a vehicle or towed that is designed or used solely to store and transport fuel for transfer into or from an aircraft, motor ...

Long-term contracts (15-20 years) for energy storage are essential as they offer stability and financial security to project developers for large-scale projects.

Despite the potential for these projects to reduce onsite energy consumption, build resiliency, and lower operational costs in the long term, the initial expenses are often high. However, there ...

LPO can finance short and long duration energy storage projects to increase flexibility, stability, resilience, and reliability on a renewables-heavy grid.

Beginning on the effective date of the rule, owners and operators of mobile refuelers at a non-transportation-related facility no longer need to provide sized secondary containment ...

The LDES program, in part, leverages funding made available through the California Climate Investments initiative, and is aligned with its goals of prioritizing ...

Long-duration energy storage (LDES) is a cost-effective option to increase grid reliability and resilience so that reliable, affordable electricity is ...

While the energy storage market continues to rapidly expand, fueled by record-low battery costs and robust policy support, challenges ...

Beginning on the effective date of the rule, owners and operators of mobile refuelers at a non-transportation-related facility no ...

While the energy storage market continues to rapidly expand, fueled by record-low battery costs and robust policy support, challenges still loom on the horizon--tariffs, shifting ...

hort term and long term. This may be one of the most specific and complicated differences between energy storage and other power sector market analytics. Due the inherent limitation ...

This funding will focus on non-lithium technologies, long-duration (10+ hour discharge) systems, and stationary storage applications. In September 2024, DOE announced up to \$100 million in ...

Long-duration energy storage (LDES) is a cost-effective option to increase grid reliability and resilience so that reliable, affordable electricity is available whenever and wherever to ...
