The Liebherr energy storage system has been permanently installed next to a container for over four months. Compared to a diesel ...

In Austria, under the leadership of the Technical University of Graz (TU Graz), a consortium of universities, energy providers, companies and start-ups have presented the ...

Moxion is pioneering mobile energy storage to change the way we move energy through our environment.

A total of 36 Austrian companies and research institutions were identified that research innovative storage technologies within these technology groups or offer these on the Austrian market.

The Austrian Torrent and Avalanche Control Centre has deployed a Liebherr-developed battery energy storage system to power its cranes.

In Austria, only pumped-storage hydro power plants have a long tradition as a means of storing energy. But additional storage capacity using other technologies such as battery storage will ...

The Liebherr energy storage system has been permanently installed next to a container for over four months. Compared to a diesel generator, Wieser believes the main ...

The local authority in Pongau is the first to use a Liebherr energy storage system to power a construction site instead of a diesel generator. This saves around 2,000 litres of ...

The primary goal of this challenge is to find energy storage solutions that can be used as buffer storage in
