Jeppard Energy Resources (JER) and its subsidiary, Connect Plus Energy LDA, are developing a 12 GW solar-to-hydrogen facility in Inhambane Province, Mozambique.

Maputo, March 28, 2025 (Lusa) - Mozambique's and Germany's governments signed a EUR500,000 financing agreement on Friday to develop the green hydrogen project in the African country. ...

Mozambique has revealed new details of its ambitious energy transition strategy, which aims to make the country a leader in hydrogen production in southern Africa by 2030. ...

A UK-based developer is planning a 12GW green hydrogen and ammonia project in southern Mozambique, in what could become one of the largest solar-to-hydrogen facilities ...

The JER Mozambique Hydrogen Solar PV Project encompasses a vast ground-mounted solar installation spanning 10,000 hectares. The produced hydrogen will be transported via a 125 ...

Storing hydrogen in Mozambique's tropical climate presents unique hurdles. High temperatures accelerate hydrogen embrittlement in standard storage tanks - but new composite materials ...

A UK-based developer is planning a 12GW green hydrogen and ammonia project in southern Mozambique, in what could become ...

By utilizing solar energy to produce hydrogen, the facility will help reduce carbon emissions and promote sustainable development. ...

The solar-to-hydrogen facility in Mozambique holds the promise of delivering approximately 4,000 tonnes of
