Where is India's largest battery energy storage system located?

New Delhi: Delhi Power Minister Ashish Sood inaugurated India's first commercially approved and South Asia's largest 20 MW/40 MWh standalone utility-scale Battery Energy Storage System (BESS) at the 33 kV Kilokari sub-station in New Delhi. The system has been developed by BSES Rajdhani Power Limited in collaboration with IndiGrid, GEAPP, and TERI.

Will Delhi's first standalone battery energy storage system improve power supply?

Delhi's first standalone battery energy storage system will enhance power supply for 100,000 consumers, ensuring reliability during peak demand and outages.

What is India's first utility-scale energy storage installation?

The project, inaugurated by Delhi Power Minister Ashish Sood, is hailed as India's first commercially approved utility-scale energy storage installation. Installed at the...

How will Delhi's energy storage system help reduce power outages?

The government intends to replicate this model across Delhi to eliminate power outages, particularly during peak demand periods. The advanced energy storage system brings several benefits, including improved grid reliability, better power purchase efficiency, and seamless integration with renewable energy sources.
