Will New Zealand invest in battery energy storage systems?

The Electricity Authority Te Mana Hiko has published a draft two-year roadmap that sets out our work to support investment in battery energy storage systems (BESS). BESS will become increasingly important in the future as New Zealand's power system relies on more intermittent and variable generation. Work set out in the roadmap includes:

What is the first Renewable Project in New Zealand?

01 JUL 2024 Contact's first renewable project in Auckland to start immediately. Tesla selected as battery energy storage system supplier, the first Megapack 2 XL project in New Zealand. The battery system will discharge stored energy at a split second to significantly improve security of energy supply to New Zealanders.

What is a battery energy storage system?

A battery energy storage system (BESS) is a technology that allows for the storage of electrical energy in batteries, which can then be used to power electrical loads. BESS can be used for a variety of applications, including grid stabilisation, load shifting, backup power, and integration with renewable energy sources such as solar and wind power.

Why do you need energy storage systems?

Our energy storage systems are compatible with storing energy from renewable sources, making them an ideal solution if you want to reduce fuel consumption of a diesel generator, add reliability to a hybrid system or microgrid, or to simply optimise your business case through smart energy management - our solutions are at your service!

There are 16 Energy Storage Tech startups in Auckland, New Zealand which include Invisible Urban Charging, Vertus Energy, PowerbyProxi, OpenLoop, Charge Net NZ.

BESSNZ is a new company focused on Commercial & Industrial (C& I) and large Residential battery energy storage solutions that will lower your business running costs, provide backup ...

BESSNZ is a new company focused on Commercial & Industrial (C& I) and large Residential battery energy storage solutions that will lower your ...

The Electricity Authority Te Mana Hiko has published a draft two-year roadmap that sets out our work to support investment in battery energy storage systems (BESS).

This article comments on some of the highlights and where we see clear signals that New Zealand is "open for business" for further BESS development at scale. If you would ...

The Glenbrook BESS meets urgent energy requirements while also laying the groundwork for the renewable energy transition. It will store excess renewable energy generated during off-peak ...

With scalable solar energy storage systems that cut costs, boost resilience, and gives farms and businesses full control over your energy use. Ernest Energy provides turnkey solar and battery ...

The Energy Storage industry in New Zealand is shaped by several key considerations that potential investors and stakeholders should be aware of. Firstly, the regulatory environment is ...

The Glenbrook BESS meets urgent energy requirements while also laying the groundwork for the renewable energy transition. It will store excess ...

The project will be operational by March 2026. Contact Energy (Contact) has answered calls for more energy storage by contracting with Tesla to build a 100-megawatt ...

The project will be operational by March 2026. Contact Energy (Contact) has answered calls for more energy storage by contracting with ...

Currently, lead-acid batteries (LABs) and lithium-ion batteries (LIBs) are used in these sectors, providing a power source to a wide range of underwater robots, sensors, and inspection ...

Aggreko offers plug-and-play commercial battery storage systems that optimise energy use, improve efficiency, and reduce emissions. Our smart battery storage solutions integrate with ...
