Why is a 15kW solar system more expensive than an off-grid system?

A 15kw solar system with battery backup, off-grid or hybrid, is significantly more expensive, primarily because of the batteries. However, sometimes a hybrid system pays for itself quicker because energy storage helps to avoid peak energy rates from the utility.

What is a 15kW solar system?

Generating approximately 1,400 to 3,000 kWh of energy each month, 15kW solar systems are perfect for homeowners with larger homes and higher electricity needs. Select from an array of 15kW solar systems, including grid-tie with or without batteries and off-grid options. Or reach out to our experts for a custom solar system! Shop What's in a kit?

Where can I buy a 15kW solar system?

At A1 SolarStore we offer complete 15kw solar systems for sale where all the parts are already picked by our engineers. The majority of commercial-scope systems are grid-tie which means that you retain the connection to the grid when you add solar. Your appliances use solar energy all the time so that your bills decrease significantly.

Does a 15kW solar system have batteries?

You can also go for hybrid variation or 15kw off grid solar system. In this case your system will also have batteries that will be your backup for a power outage. Hybrid systems allow you to retain the option of a net metering but with an interrupted power supply as well. Some ask, how many batteries for 15kw solar system do you need?

Equipped with 18 high-quality 415 Watt solar panels, this kit guarantees ...

We have deployed Solar Power Container units at three of our mines and the results have been outstanding. The ease of transportation and short ...
