Is Aboitiz Power Building a hybrid battery energy storage system in Cebu?

MANILA, Philippines -- Aboitiz Power Corp. is building a 30-megawatt hybrid battery energy storage system (BESS) project within the Mactan Economic Zone in Cebu. Slated for commissioning in the first half of 2026, the project is poised to become one of the first large-scale energy storage systems in Central Visayas.

Does Cebu need more power investments?

DOE Central Visayas Director Renante Sevilla lauded the BESS project in Mactan, saying that Cebu needs additional power investments given its rapid progress. /KOC

Will Lapu-Lapu City be redirected to underserved areas in Cebu?

With Lapu-Lapu City now assured of reliable power, he noted that energy supply from the National Grid Corporation of the Philippines (NGCP) could be redirected to underserved areas in Cebu. Cebu Governor Pamela Baricuatro, also present at the launch, lauded the project for aligning with the province's climate and development agenda.

How will a new energy storage facility improve energy security?

The facility, designed to store excess energy for use during peak demand, is expected to enhance grid stability, reduce reliance on fossil fuels, and improve energy security across the province.

The hybrid BESS will function as an ancillary service--storing excess energy and discharging it when needed to help balance the grid. This capability supports power quality and reliability, ...

The facility, designed to store excess energy for use during peak demand, is expected to enhance grid stability, reduce reliance on fossil fuels, and improve energy security ...

Slated for commissioning in the first half of 2026, the facility is one of the first large-scale energy storage

systems in Central Visayas. It ...

Slated for commissioning in the first half of 2026, the project is poised to become one of the first large-scale energy storage systems in Central Visayas.

Slated for commissioning in the first half of 2026, the facility is one of the first large-scale energy storage systems in Central Visayas. It aims to support rising power demand from ...

The project, approved by the Philippine Economic Zone Authority, is part of AboitizPower's broader push for a more flexible, stable, and intelligent energy system in the ...

The Philippine Economic Zone Authority (PEZA) approved the project in January 2025. PEZA Director General Tereso Panga said the ...

Slated to begin operations in May 2026, the project is expected to boost grid stability by storing excess energy and dispatching it during peak demand or supply disruptions, ...

The project, approved by the Philippine Economic Zone Authority, is part of AboitizPower's broader push for a more flexible, ...

Integrated energy utility Aboitiz Power has kicked off a 30MW hybrid battery energy storage system (BESS) project in the Philippines. The company said on Wednesday (16 July) ...

Scheduled for completion in the first half of 2026, the facility is expected to become one of Central Visayas' earliest large-scale energy storage installations. The project will be ...

Integrated energy utility Aboitiz Power has kicked off a 30MW hybrid battery energy storage system (BESS) project in the Philippines. ...
