Why should you install a battery energy storage system in the Philippines?

BESS acts as a buffer between the grid and your facility, ensuring a consistent and reliable power supply. BESS can help keep essential appliances running in areas where power outages are common. Curious to find out how much you can save installing battery energy storage systems in the Philippines?

Why is the Philippines betting on battery energy storage systems?

The Philippines is betting on battery energy storage systems (BESS) to achieve its ambitious renewable energy (RE) targets and build a more sustainable energy future.

What is Masinloc battery energy storage?

We started our venture into battery energy storage technology in 2018 when we acquired the 10 MW Masinloc Battery Energy Storage System (BESS) of the Masinloc Power Plant from AES Philippines. The Masinloc BESS is the first battery energy storage facility in the Philippines and one of the first in Southeast Asia.

How is Bess transforming the Philippine energy industry?

With the commercial operations of approximately 1,000 MW of BESS facilities across 32 locations in the Philippines, we are now ushering in a new era for the Philippine energy industry through significant improvements in grid reliability and the integration of more renewable power sources to the country's diverse energy mix.

Philippines investor-owned utility AboitizPower and Norwegian renewables group Scatec have signed a EPC agreement with Hitachi Energy for it to ...

Currently, most battery energy storage systems (BESS) operating in the Philippines are paired with thermal generation plants to enhance their competitiveness. ...

Are you a business owner curious about installing battery energy storage systems in the Philippines? Read our complete guide to learn more!

FLUENCE has commenced commercial operations of the first 20 MWh battery energy storage system (BESS) out of the 470 MWh portfolio to be deployed for SMC Global ...

Philippines investor-owned utility AboitizPower and Norwegian renewables group Scatec have signed a EPC agreement with Hitachi Energy for it to build a 20MW/20MWh battery storage ...

Philippines investor-owned utility AboitizPower and Norwegian renewables group Scatec have signed a EPC agreement with Hitachi Energy for it to build a 20MW/20MWh ...

The power arm of Philippines-based brewing-to-energy conglomerate San Miguel Corporation (SMC) is moving on its ambitious plan to deploy 1GW of batteries this year, with its first, ...

Despite these hurdles, the DOE remains steadfast in its belief that BESS is a critical component of the Philippines" transition to a cleaner ...

The projects have a capacity of 20 MW / 20 MWh and 40 MW / 40MWh respectively, and are part of the earlier announced energy storage orders. These are the first ...

Despite these hurdles, the DOE remains steadfast in its belief that BESS is a critical component of the Philippines" transition to a cleaner and more sustainable energy ...

Energy storage systems (ESS) are critical for balancing energy supply and demand, enhancing grid stability, and enabling the integration of renewable energy sources ...

The Masinloc BESS is the first battery energy storage facility in the Philippines and one of the first in Southeast Asia. Our acquisition of Masinloc BESS is a landmark milestone that drives the ...
