Is battery energy storage a pillar of Romania's energy transition?

Recent updates about investments in battery energy storage systems (BESS) in Romania indicate the technology is becoming another pillar of the country's energy transition alongside wind power. For several years now, photovoltaics, and prosumers in particular - including municipal authorities, have dominated the scene.

What is Romania's largest battery project?

Leading the development is Nova Power & Gas, part of the Romanian E-Infra Group, which has unveiled plans for the nation's largest battery project to date. The company will build a 400 MWh facility in Floresti, Cluj county, which is expected to be operational by the end of 2025.

How is Romania transforming the European energy landscape?

The investment wave, supported by key regulatory changes, is elevating Romania in the European energy landscape. Leading the development is Nova Power & Gas, part of the Romanian E-Infra Group, which has unveiled plans for the nation's largest battery project to date.

How long will a battery energy storage system last in Romania?

It is about to start building the BESS in Scornicesti in Olt county, west of Bucharest. R. Power is planning to complete it in a year. The battery energy storage system would have a duration of two hours, translating to 254 MWh in capacity. The project received funding from the National Recovery and Resilience Plan (NRRP or, in Romanian, PNRR).

Econergy plans to equip every connected and ready-to-connect solar project in Romania with electricity storage capacity. The aim is to consolidate and expand its position in ...

Bucharest, July 22, 2025 - Nova Power & Gas, a Romanian energy company and part of the E-INFRA Group,

announces the launch of the largest battery energy storage project in Romania.

Nova Power & Gas, a Romanian energy company and part of the E-INFRA group, announces the start of the largest battery storage project in Romania. The facility, to be built in ...

Prime Batteries, a company supported by InnoEnergy, and Monsson have put into operation the largest electricity storage capacity in Romania. This is part of the first hybrid ...

In an accelerating investment wave, companies in Romania are combining BESS with solar power, hydropower and wind power, or building standalone energy storage facilities. ...

Econergy plans to equip every connected and ready-to-connect solar project in Romania with electricity storage capacity. The ...

Bucharest, July 22, 2025 - Nova Power & Gas, a Romanian energy company and part of the E-INFRA Group, announces the launch of the largest ...

Discover all relevant Energy Storage Companies in Romania, including Prime Batteries Technology and Monsson Alma

Prime Batteries, a company supported by InnoEnergy, and Monsson have put into operation the largest electricity storage capacity in ...

An analysis of how Chinese and South Korean companies are competing in the global battery energy storage market, with implications for international trade and energy security.

Nova Power & Gas, a Romanian energy company and part of the E-INFRA group, announces the start of the largest battery storage ...

The investment wave, supported by key regulatory changes, is elevating Romania in the European energy landscape. Leading the ...

Nova Power & Gas currently leads the national energy storage capacity with 240 MWh already operational. The company is also a key supplier of electricity and natural gas, ...

The investment wave, supported by key regulatory changes, is elevating Romania in the European energy landscape. Leading the development is Nova Power & Gas, part of the ...

An analysis of how Chinese and South Korean companies are competing in the global battery energy storage

market, with implications ...

In an accelerating investment wave, companies in Romania are combining BESS with solar power, hydropower and wind power, or ...
