Rivus Batteries and Bengt Dahlgren will install Sweden's first organic flow battery in pilot-scale at HSB Living Lab in Gothenburg.

Explore how Gothenburg is shaping the battery industry. Discover innovations and investment opportunities in sustainable mobility today!

Discover how collaboration is fueling Gothenburg's thriving battery cluster, including advancements in hydrogen fuel cell tech and ...

The definition of a battery is a device that generates electricity via reduction-oxidation (redox) reaction and also stores chemical energy (Blanc et al., 2010). This stored ...

Discover how collaboration is fueling Gothenburg's thriving battery cluster, including advancements in hydrogen fuel cell tech and sustainable transport solutions.

"Under the eaves of a four-storey building in southern Gothenburg, the batteries of the future are being developed". Tidningen ...

We'll end with something you've never heard: Vanadium flow batteries are being tested for railway energy recovery. When trains brake in Sweden's mountainous north, ...

Key Insight: Sweden is poised to add 5-7 GWh of long-duration storage by 2030, with vanadium flow batteries expected to grow at 20% CAGR in industrial and rural applications.

In this project we will address the mechanism of VRFB operation at both molecular and device levels. We

Vanadium flow battery in Gothenburg Sweden

intend to explore the ...

"Under the eaves of a four-storey building in southern Gothenburg, the batteries of the future are being developed". Tidningen Energi recently visited us and stepped into what ...

In this project we will address the mechanism of VRFB operation at both molecular and device levels. We intend to explore the catalysis of the reactions happening on positive ...

In the coming years Gothenburg and West Sweden will have in place two battery gigafactories, with major investments being made by public and private actors, including Volvo Cars and the ...

CellCube's vanadium flow battery technology aimed to overcome the renewable intermittency and acts as a buffer between demand and supply of energy in a small village in Sweden.
