The first plant is currently under development in Aspern, Vienna. While OMV handles subsurface operations (including deep ...

The aim of this exploratory study with the working title "Climate Hub Vienna" was to design an urban innovation laboratory that supports the acceleration of decarbonisation in Vienna.

Vienna is also on track to becoming the country's centre for green energy: by 2050, the city aims to meet half its ...

Vienna is also on track to becoming the country's centre for green energy: by 2050, the city aims to meet half its energy consumption from renewable sources - and be close to ...

Future challenges include developing cooling strategies for hotter summers while ensuring energy efficiency. The city of Vienna has developed an ambitious plan to phase-out ...

The first plant is currently under development in Aspern, Vienna. While OMV handles subsurface operations (including deep drilling and thermal water extraction), RED ...

To get off gas, Vienna plans to heat buildings using heat pumps, capturing gases from waste, burning waste, and geothermal wells. These geothermal wells are a joint-venture ...

Imagine storing energy as simply as filling a balloon with air--sounds almost too easy, right? That's essentially what Vienna's compressed air energy storage (CAES) project ...

This book highlights MetroLab's "Mapping the Zero-Carbon City Region" project, organized into three parts.

The first introduces the MetroLab approach, focusing on five key areas--Living, ...

This book highlights MetroLab's "Mapping the Zero-Carbon City Region" project, organized into three parts. The first introduces the MetroLab ...

The project is an important milestone on the way to a climate-neutral heat supply for Vienna. Once completed, the plant in Vienna's 22nd district will feed into the city's district ...

PDS Timeframe Investment programme description ELENA PDS will be used by Wien Energie to prepare and implement investments for a seasonal heat energy storage system, in ...

We are redeploying our assets, people and skills into zero carbon energy production including: Hydrogen (H₂) production and storage project, and Novel geothermal pilot project with ...
