As MIT's first vice president for energy and climate, Evelyn Wang is working to broaden MIT's research portfolio, scale up existing innovations, seek new breakthroughs, and ...

Growing energy demand means the U.S. will almost certainly have to expand its electricity grid in coming years. What's the best way to do this? A new study by MIT ...

Muscat: Agreement for Oman's first utility-scale solar and battery storage project with an investment worth of OMR115 million was signed on Monday.

In March 2024, well-known Omani firm Nafath Renewable Energy signed an MoU with Takhzeen, a 100 per cent subsidiary of publicly traded firm ONEIC, to help introduce ...

A consortium including Abu Dhabi Future Energy Co. (Masdar), Al Khadra Partners, Korea Midland Power Co. and OQ Alternative Energy have been chosen to build a ...

In MIT course 15.366 (Climate and Energy Ventures) student teams select a technology and determine the best path for its commercialization in the energy sector.

The Ibra III Solar Independent Power Project will combine a 500MW photovoltaic plant with a 100MWh battery energy storage system. ...

The Ibra III Solar Independent Power Project will combine a 500MW photovoltaic plant with a 100MWh battery energy storage system. The consortium includes Abu Dhabi ...

As Middle Eastern countries race to diversify from oil dependence, Oman's energy storage enterprises are

quietly building the region""s most innovative battery farms and thermal storage ...

The Ibri III project will combine a 500 MW solar plant with a 100 MWh battery energy storage system, making it Oman"''s first utility-scale solar-plus-storage system.

Building on Oman"''s efforts to deploy sufficient energy storage capacity to address grid intermittency challenges associated with the renewable energy transition, Oman"''s ...

MIT engineers developed a membrane that filters the components of crude oil by their molecular size, an advance that could dramatically reduce the amount of energy needed ...

Giving people better data about their energy use, plus some coaching, can help them substantially reduce their consumption and costs, according to a study by MIT ...

The Ibri III project will combine a 500 MW solar plant with a 100 MWh battery energy storage system, making it Oman"''s first utility ...

MIT researchers developed a new fabrication method that could enable them to stack multiple active components, like transistors and memory units, on top of an existing ...

The approved Muscat Energy Storage Project positions Oman at the forefront of Middle Eastern energy innovation, combining cutting-edge battery tech with smart grid solutions.
