We visualise an economy with 100% renewable energy utilising base load geothermal and waste-to-energy, complemented by intermittent wind and solar in the energy mix by 2030.

The Grenada solar energy storage project construction represents a critical step toward energy independence. With rising electricity costs and climate risks, this initiative combines solar ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

Proposes the establishment of a 100% renewable energy target for both the electricity and transport sectors for 2030. The policy focuses on utility scale geothermal generation, wind and ...

The ERC provides an overview of the energy sector performance in Grenada. The ERC also includes energy efficiency, technical assistance, workforce, training and capacity building ...

Can photovoltaic-energy storage-integrated charging stations improve green and low-carbon energy supply? The results provide a reference for policymakers and charging facility operators.

Fun fact: The system's total capacity could charge 12,000 electric vehicles simultaneously - roughly twice the number of cars on Grenada's roads!

In 2020, Grenada produced 223 GWh of electricity, relying mainly on fossil fuels (98.12%), with a small contribution from solar energy (1.88%). In 2018, peak demand was 33.2 MW.
