What is a sub panel breaker box?

Sub panel: Sometimes called a satellite panel, a sub panel breaker box can be added to segment power from the main electrical panel into a separate, downstream load center. Once installed, subpanels have their own breakers and circuits that originate from a single power circuit from the main electrical panel.

What is a sub panel board?

Once installed, subpanels have their own breakers and circuits that originate from a single power circuit from the main electrical panel. A sub panel board, typically a Main Lug Only (MLO) type load center, can be placed anywhere on a structure and allows electricians to safely add extra circuits without replacing the main panel.

What is a circuit breaker panel?

Electric panels, known by various names such as fuse boxes, breaker boxes, or circuit breaker panels, are crucial in distributing power throughout your property. Modern homes typically feature a circuit breaker panel, distinct from the older fuse box by its use of mechanical, toggle-switch circuit breakers instead of fuses.

What is a panelboard & a switchboard?

A panel board, or panelboard, is often found in commercial and industrial lighting with higher voltage tolerances up to 600V and with a maximum current rating of 1,200 A. They feature a larger and deeper enclosure with bolt-on breakers that attach with threaded screws. Shop Panelboards & Switchboards

Buy a wholesale sub breaker panel and experience smooth management and distribution of electricity. Visit Alibaba and order power distribution equipment that you like.

We ensure your system meets current standards, offering everything from the fitting of new panels to the addition of circuit breakers in existing systems, for both homes and businesses.
