-----  
Will Cemex & synhelion develop fully solar-driven cement production?

Cemex and Synhelion have made significant progress in their joint effort to develop fully solar-driven cement production. They have scaled their technology to industrially-viable levels, enabling the continuous production of clinker, the most energy-intensive part of cement manufacturing, using only solar heat.

Can solar clinker be used for cement production?

For the first time ever, CEMEX and Synhelion successfully connected the clinker production process with the Synhelion solar receiver, producing solar clinker. This revolutionary innovation is an initial step to develop fully solar-driven cement plants.

What is a solar clinker?

This revolutionary innovation is an initial step to develop fully solar-driven cement plants. CEMEX, S.A.B. de C.V. ("CEMEX") and Synhelion announced today the successful production of the world's first solar clinker, the key component of cement, a significant step towards developing fully solar-driven cement plants.

Will Cemex & synhelion build a pilot cement plant?

Cemex and Synhelion will now take further steps toward constructing a pilot cement plant powered by solar energy. Fernando A. González, CEO of Cemex, stated, "I am convinced we are getting closer to the technologies that will enable net-zero CO<sub>2</sub> cement and concrete production."

Cemex and Synhelion report prospective scaling of a high-temperature process to industrially-viable levels, where solar energy supplants fossil fuel combustion. This marks a ...

Cemex and Synhelion announced today a significant milestone in their joint effort to develop fully solar-driven cement production: the ...

Green, carbon-free, sustainable solar energy solutions for cement factories to help build the planet's future. Throughout history and until the present ...

Cemex and Synhelion will now take further steps toward building a solar-driven industrial-scale pilot cement plant.

Synhelion and Cemex announced today a significant milestone in their joint effort to develop fully solar-driven cement production: the scaling of their technology to industrially ...

Cemex and Synhelion are on their way toward achieving a fully solar-powered cement production with the latest scaling of their technology to industrially-viable levels.

CEMEX and Synhelion announced today the successful production of the world's first solar clinker, the key component of cement, ...

Cemex and Synhelion report prospective scaling of a high-temperature process to industrially-viable levels, where solar energy ...

This is where the CemSol project comes in, short for "solar production of cement with integrated CO<sub>2</sub> capture". The team of ...

Cemex and Synhelion announced today a significant milestone in their joint effort to develop fully solar-driven cement production: the scaling of their technology to industrially ...

Green, carbon-free, sustainable solar energy solutions for cement factories to help build the planet's future. Throughout history and until the present period of unceasing progress, ...

This is where the CemSol project comes in, short for "solar production of cement with integrated CO<sub>2</sub> capture". The team of scientists is developing a process in which the ...

Cemex and Synhelion announced a significant milestone in their joint effort to develop fully solar-driven cement production.

Synhelion and Cemex announced today a significant milestone in their joint effort to develop fully solar-driven cement production: the ...

CEMEX and Synhelion announced today the successful production of the world's first solar clinker, the key component of cement, a significant step towards developing fully ...
