Do I need planning clearance for a commercial energy storage system?

Planning clearance is required prior to submission to Building Application for permit. Commercial energy storage systems must be designed by an Electrical Engineer. If a photovoltaic system is also part of the installation, please refer to the City of Covina - Residential Submittal" checklist.

What is the energy storage strategy & roadmap (SRM)?

WASHINGTON, D.C. - The U.S. Department of Energy (DOE) today released its draft Energy Storage Strategy and Roadmap (SRM), a plan that provides strategic direction and identifies key opportunities to optimize DOE's investment in future planning of energy storage research, development, demonstration, and deployment projects.

What is the energy storage permitting guidebook?

The Energy Storage Permitting Guidebook focuses on permitting of behind-the-meter (BTM) systems that are customer-sited, meaning they are located at homes, businesses, nonprofits, schools, and other properties to provide energy on-site (and, typically, to the grid as well).

Why is California integrating energy storage into the power system?

Driven by a series of targeted bills and executive orders, California is working to integrate energy storage projects into the power system to improve resiliency to extreme events (like wildfires and heat waves), reduce greenhouse gas emissions, and lower costs for ratepayers.

Subsequent versions of the guidebook will include information for nonstandard residential energy storage systems, commercial energy storage systems, and authorities ...

Show required working clearances for all existing/new electrical equipment. Show method and location of required ventilation for equipment. Show method of protection against ...
